25X1

1. At the Strecno (N48-11, E18-52) exit of the railroad line between Zilina and Vrutky (N49-07, E18-55), the two tracks separate to cross the Vah River on two identical bridges about 100 meters apart. The bridges are about 200 meters long. Having crossed the Vah, the two lines pass through the mountain by way of two separate tunnels. The road continues to follow the sweep of the river.
2. The bridges and the entrances and exits of the tunnels are guarded by a detachment of Interior Guard (VS). Parking of automobiles along the road and taking of photographs are forbidden. The following sketches (see Annex) show the location of the bridges and the general appearance of one of them.
